**Subject:** Summary of permit reopener conversation - Kampachi

All,

Based on our conversation today, no specific reopener clause related to a potential cage design change will be added into the Kampachi NPDES permit. We have initiated ESA and EFH consultations based on both a deadweight anchor and an embedment anchor and that is the only change we know of at this time.

At this time we anticipate that consultations will be completed prior to permit issuance and we can revisit this at a later date if it changes.

Thanks,

Meghan
